

Sterimar Baby Stop & Protect Cold

Uses

Fights cold symptoms by washing out nasal cavities. Relieves congested nasal passages and helps baby to breathe easier.

Dosage

Children 3 months to 3 years: release the spray by briefly pressing down on the pump. Lay baby down on his/her side or sit up with baby's head tilted to one side. Gently insert the nozzle into the nostril and press briefly. Let any excess solution run out before wiping the nose. Repeat in the other nostril. Use as soon as the first symptoms of a cold appear until the nose is unblocked, or as long as your doctor recommends.
