

Care Co-Lactase Infant Drops

Uses

To reduce lactose content in milk. Suitable for both breast and formula milk.

Dosage

Suitable from birth. Breast feeding: express a few tablespoons of breast milk into a small sterilised container. Add 4 drops and give to the baby on a sterilised plastic spoon or using a syringe and continue breast feeding as normal. Infant formula: make the baby formula according to the manufacturer's instructions. Add 4 drops to the formula when at feeding temperature. Do not add to the formula if it is hot. Shake the formula and feed as normal. Discard any unused formula. Expressed breast milk: defrost the milk if necessary and warm to feeding temperature. Add 4 drops to the milk when warm.
