

Relaxit Micro-enema 5ml

Uses

Helps ease the problem of constipation by softening hardened stools.

Dosage

Remove nozzle and squeeze out a drop of fluid to lubricate the nozzle tip. Insert nozzle fully into the back passage (rectum). (Children under 3 years: insert only half the length of the nozzle.) Squeeze out the contents fully and then withdraw the nozzle, still squeezing the tube lightly.

Format and Ingredients

Single use 5ml tube containing:
Sodium Citrate Dihydrate 450mg, Sodium Laurylsulfate 75mg,
