

Benacort 64 Micrograms Nasal Spray

Uses

Prevention and treatment of seasonal allergic rhinitis (hayfever).

Dosage

Over 18 years: once daily dosing: 2 sprays into each nostril each morning. Twice daily dosing: 1 spray into each nostril morning and evening. If good effect is achieved reduce to 1 spray into each nostril each morning. The minimum dose should be used at which effective control of symptoms is maintained. Treatment of seasonal rhinitis should start, if possible, before exposure to the allergens. Under 18 years not to be used.
