The training guide for pharmacy assistants

recommended to continue Step 2 (15mg) for 8 weeks and decrease the dose to 10mg (Step 3) for the final 4 weeks. Temporary abstinence: the patch can be used in those situations where smokers cannot or do not want to smoke for prolonged periods (greater than 16 hours). For shorter periods an alternative intermittent dose form would be more suitable (e.g. Nicorette Inhalator or gum). Smokers of 10 or more cigarettes per day are recommended to use the 25mg patch and lighter smokers (those who smoke less than 10 cigarettes per day) the 15mg patch. Under 12 years: not recommended.
